Parker Veterinary Clinic of Parker, SD has plenty of work for two associates. We have a 55% large animal and 45% small animal breakdown. The large animal has a big portion of beef cow/calf activity but a dairy associate could stay comfortably busy as there are large dairies in the area that we service. Also, inside is a hydraulic tilt table for feet and leg work. There is in addition a portable hydraulic chute for taking to the farm when needed. We do spays, neuters, declaws, amputations, “c” sections, bladder stone removals and various other kinds of surgeries. We have an Idexx blood chemistry machine, and a Heska hematology machine. We also have a DR wizard digital x ray machine. There are a small number of sheep, goats, horses and chickens. It truly is a mixed animal practice. We have a nice group of young farmers in our area. The practice is located 30 miles from Sioux Falls. The small animal component could be expanded greatly. Honesty and integrity and a healthy respect for the clients have been integral in building this practice. Relationships have been built and valued from both sides.
